As a seasoned React.js developer with over 1+ years of hands-on experience, I bring a wealth of expertise in crafting dynamic and responsive web applications. With a keen eye for detail and a passion for innovation, I excel in translating intricate user requirements into scalable, high-quality code. My dedication to staying abreast of the latest web technologies ensures that I deliver cutting-edge solutions that meet and exceed client expectations. Collaborative by nature, I thrive in team environments, consistently contributing to the seamless delivery of exceptional user experiences.

Experience

REACT JS DEVELOPER - Deminum

May 2023 – Present

REACT JS DEVELOPER - DanzeeTech

Feb 2023 – May 2023

- Demonstrated expertise in building dynamic and responsive web applications using React.js and related technologies.
- Extensive experience in developing modular and reusable components, contributing to scalable and maintainable codebases.
- Proficient in implementing state management solutions, including hands-on experience with Redux, to ensure seamless data flow and application stability.
- Successful integration of RESTful APIs and third-party services to enhance application functionality and user experience.
- Skilled in creating visually appealing, mobile-friendly interfaces that prioritize an optimal user experience across various devices.
- Experienced in Agile methodologies, consistently delivering high-quality solutions within project timelines and adapting to evolving requirements.

Education

University of Central Punjab, Lahore

2020

- ADP in IT (Networking, DBMS, Software Development methodologies, Communication skills)
- GPA: 3.24

Islamia University of Bahawalpur

2023

- Master's in Computer Science (Web Design, & Development, DSA, Object Oriented Programming)
- GPA: 3.44

Skills

- HTML5 & CSS3
- React
- Bootstrap & Tailwind CSS
- Responsive and Animated Designs
- Redux
- RESTful API Integration
- React Router
- JavaScript(ES6)

Projects

YAK SPORT

As a frontend developer I worked on YAK Sport that is an app for guests at Titanic Deluxe Lara and Titanic Beach Lara hotels, offering details on luxurious amenities like sports facilities, entertainment, and excursion booking for a memorable stay.

EVARTO

Evarto is Denmark's premier platform for booking events, ranging from parties to conferences, with a vast network of over 950 partners across the country. As a frontend developer on this project, I contributed to creating a user-friendly interface that enables seamless event bookings, ensuring customers find the perfect venue tailored to their needs, whether it's for size, budget, location, or specific requirements.

Tyna Giang's Integrated Agro-Forestry Farming Model

Contributed as a React.js developer to Tyna Giang's pioneering agro-forestry farming model, recognized as a top project in Vietnam's "100 projects to combat climate change" by the Ministry of Environment, Energy, and Sea, France, in 2016. Developed responsive user interfaces to facilitate efficient data visualization and management, aiding in the project's mission to address climate change through sustainable agricultural practices.

Azerbaijani's Bafik Republica

As a React.js developer, I contributed to a project aimed at elevating the quality of life for urban consumers through unparalleled convenience. Our mission was to create intuitive, user-friendly interfaces that seamlessly integrated with backend systems to deliver an exceptional user experience. Whether it was optimizing checkout processes or enhancing navigation, our focus was on making everyday tasks easier and more efficient, embodying our commitment to convenience and driving us to continually innovate.
